## CAREER OBJECTIVE

Aspiring Full Stack Developer with strong knowledge in React.js, JavaScript, Python, and modern web technologies. Passionate about building real-time, responsive web applications and eager to contribute to dynamic development teams. Seeking an entry-level role where I can apply my skills, learn from industry experts, and grow as a versatile developer.

## Projects

### BloodLink: Blood Bank Finder

July-October 2025

- Technology : React, Django
- Developed a full-stack **Blood Bank Finder system** with separate user roles (**Doctor, Hospital, Donor**) for registration and login.
- Implemented **advanced blood search functionality** with location-based filtering to quickly connect donors and receivers.
- Helps in emergency situations by instantly showing nearby donors and hospitals.

### Smart Restaurant Ordering System

May-July 2025

- Technology : React
- Provides separate sections for Veg, Non-Veg, and Fast Food ordering and table booking.
- Includes **payment integration** and table reservation feature.
- Designed a responsive, user-friendly restaurant website.

## Internship

### NoviTech R&D Private ltd

Feb-April 2024

- Developed and maintained responsive web pages using **HTML, CSS, JavaScript, and Bootstrap**.
- Learned Bootstrap and Few Animations for responsive webpages.
- Created a responsive portfolio for showcasing my skill sets.
