PROFESSIONAL SUMMARY

Enthusiastic Full Stack Developer with hands-on experience in building scalable web applications using React.js, Django, and REST APIs. Skilled in developing CRM systems, implementing role-based access control, and integrating AI-driven MCP servers. Passionate about creating efficient, user-focused solutions.

TECHNICAL SKILLS

- **Programming** : Python , JavaScript
- **Frontend** : HTML5, CSS3, JavaScript (ES6+) , React.js, Next.js, Vue.js(Basic), Bootstrap / Tailwind CSS , Responsive Web Design , Redux Toolkit, Slice-based State Management, Global State Handling
- **Backend** : Django, FastAPI, Django REST Framework , Role-Based Access Control (RBAC), Business Logic Implementation, MCP (Model Context Protocol) Server Development
- **Architecture**: MVT Architecture, Client-Server Architecture, MCP Architecture (AI ↔ Backend Integration)
- **Database Management** : MySQL, SQLite, PostgreSQL, CRUD operations, Django ORM, setup & configuration
- **API & Integration** : REST API Development & Integration, API Integration (Frontend ↔ Backend), JSON, HTTP Methods
- **Tools & Technologies** : Git & GitHub, VS Code , Postman

EDUCATION

Adithya Institute of Technology, Coimbatore. Bachelor Degree, Electronics and Communication Engineering	2021 – 2025 CGPA: 7.2/10
St Francis Higher Secondary School, ck.Mangalam Higher Secondary	2020-2021 Percentage: 80%
St Francis Higher Secondary School, ck.Mangalam SSLC	2018-2019 Percentage: 75%

WORK EXPERIENCE

Full Stack Developer SaaSTrail Venture Studio	Sep 2025 – Present Coimbatore
• Developed and maintained full-stack web applications using React.js, Django, and Django REST Framework, building responsive user interfaces with HTML5, CSS3, and Bootstrap / Tailwind CSS, and integrating frontend with backend services through RESTful APIs. • Implemented authentication, authorization, and RBAC; developed CRM features with business logic and validations. • Tested and debugged REST APIs using Postman, managed environment variables using .env files, and followed a structured development workflow with Git & GitHub while adhering to clean coding practices.	

- Designed and managed **databases using MySQL** , handled **database setup, ORM-based CRUD operations**, and integrated **third-party and internal APIs** using **JSON and HTTP methods** following **client-server architecture**.
- Developed and integrated MCP (Model Context Protocol) tools for the UNAXL product using FastAPI. Connected the backend tools with Claude Desktop to enable AI-assisted workflows and seamless tool communication.
- Worked on the **PromptXL product** using **React.js, Next.js** developing CRM dashboard sections with dynamic UI functionalities Implemented **interactive dashboard features** with data handling actions, real-time UI updates, and seamless user interactions.

PROJECTS

LUVARASTORE – Ecommerce Website

- Developed a **full-featured fashion e-commerce website (Luvarastore.com)** with product listings, user authentication, cart, and order management functionalities.
- Built a **responsive, user-friendly UI** using modern frontend technologies to ensure a seamless shopping experience across devices.
- Implemented **secure payment gateway integration** with an end-to-end checkout workflow, enabling smooth order processing and reliable transaction management.
- I worked **CRM-based application features** with clearly defined **Admin and User modules**, implementing **role-based access control (RBAC)** to ensure secure and controlled system functionality.
- Built **Admin modules** for user, product/data, order management, and dashboard analytics, and **User modules** for authentication, profile management, and application-specific workflows.

Tech Stack: React.js , Bootstrap, Redux Toolkit, Python, Django REST Framework

BLOODLINK – Blood Finder & Management System

- Developed **BloodLink**, a blood finder and management system with **Doctor, Hospital, and Donor modules**, enabling efficient coordination and communication between stakeholders.
- Built a **responsive and user-friendly UI** to ensure seamless access across desktop, tablet, and mobile devices for Doctors, Hospitals, and Donors.
- Implemented **Hospital-to-Hospital** and **Doctor-to-Hospital blood request workflows** with **request, accept, and reject functionalities** to manage real-time blood requirements.
- Built **separate role-based dashboards** for Doctors, Hospitals, and Donors to handle requests, availability, and status tracking effectively.
- Implemented **nearby donor search functionality**, allowing hospitals and doctors to quickly identify and contact eligible donors based on location and availability.

Tech Stack : React.js , JavaScript , Bootstrap, Django REST Framework, Python

CERTIFICATIONS

- **Python Full Stack Course : Careerladder institute(Coimbatore)**

May2025 - Aug2025
